

FINANCIAL PERFORMANCE & RATIO ANALYSIS REPORT

Company Name: *UzAuto Motors*

Period Covered: *FY 2022 – FY 2025*

Prepared By: *Abror*

Date: *13 Sep 2026*

EXECUTIVE SUMMARY & TOP-LINE PERFORMANCE

- Net revenue peaked at \$4,450.0M in FY 2023, primarily driven by a dramatic increase in vehicle manufacturing volumes, the successful launch of new higher-value vehicle models, and strategic price adjustments.
- Core operating performance experienced steady decline, with Gross Profit moving from \$480M in FY 2022 to \$459 in FY 2025.
- Net Income increased to \$339.60M in FY 2025, representing a Net Profit Margin of 8.28%.
- While Gross Profit indicated roughly 20M loss in four years, alongside with Operating Profit which dropped by 18M, Net Income rose to \$339.60M in 2025. Additionally, Equity outstands with doubling the amount in this period.

Metric (in \$ Millions)	FY 2022 (M)	FY 2023 (M)	FY 2024 (M)	FY 2025 (M)	YoY Change 22-23	YoY Change 23-24	YoY Change 24-25
Net Revenue	\$3,260	\$4,450.0	\$4,200.00	\$4,100.00	36.50%	-5.62%	-2.38%
Gross Profit	\$480	\$558.60	\$581.90	\$459.70	16.38%	4.17%	-21.00%
Operating Profit	\$310	\$365	\$383.30	\$292.50	17.74%	5.01%	-23.69%
Net Income	\$235.10	\$333.60	\$314.90	\$339.60	41.90%	-5.61%	7.84%
Total Assets	\$2,100	\$2,350	\$2,500	\$2,600	11.90%	6.38%	4.00%
Total Equity	\$650	\$780	\$908.80	\$1,300.00	20.00%	16.51%	43.05%

- In 2022-2025 period, the Operating profit rate of UZMT was primarily slowed down by a combination of growth of production costs, sticky administrative overheads, and a sharp increase in both domestic and international competition.
- Factors including: High Inflation, Supply Chain Delays, and New Production Lines are the causes those drive Cost of Goods Sold (COGS), which directly gross profit. For example, High inflation, its impact on UZMT's factories is that Local energy, steel, and labor become more expensive, which leads to Increase in COGS.

MARGIN & PROFITABILITY ANALYSIS

- Gross Margin %: Moved from 14.72% in FY 2022 to 11.21% in FY 2025
- Operating Margin %: Moved from 9.51% in FY 2022 to 7.13% in FY 2025
- Net Profit Margin %: Moved from 7.21% in FY 2022 to 8.28% in FY 2025

- Margin Story: In FY 2025, gross and operating margins compressed because UZMT suffered a classic “scissors effect” – their sales revenues were cut from the top, while their expenses and input costs kept rising from the bottom.
- In FY 2025, UZMT’s Net Profit Margin diverged from its Operating Margin, creating a major financial paradox.

CAPITAL EFFICIENCY, RISK & CONCLUSION

- **Return on Assets (ROA):** Shifted from 11.20% (FY 2022) to 13.06% (FY 2025)
- **Return on Equity (ROE):** Shifted from 36.17% (FY 2022) to 26.12% (FY 2025)

- Total Equity expanded significantly from \$650M in FY 2022 to \$1,300M in FY 2025
- **Implication for ROE:** Because the equity base doubled faster than net income, ROE naturally compressed, which signals that the company need to deploy retained earnings more aggressively is building a safer cushion.
- **Primary Risks:**
 1. **Core Manufacturing Margin Compression:** Gross margin fell from 13.85% in FY 2024 to 11.21% in FY 2025, signaling rising production costs, raw material inflation, or price discounting that hurts unit profitability.
 2. **Reliance on Non-Operating Income:** While Net Income rose 7.8% in FY 2025 to \$339.6M, this bottom-line growth was supported by non-operating factors rather than vehicle sales, creating earnings volatility if non-operating items fade.
 3. **Equity Dilution & ROE Compression:** Total Equity jumped 43% in FY 2025 to \$1,300M. Because equity expanded faster than earnings, Return on Equity (ROE) dropped sharply from 34.65% to 26.12%, indicating underutilized capital cushion.
- **Strategic Recommendations:**
 1. **Supply Chain & COGS Optimization:** Implement stricter direct-cost controls and supply chain efficiency programs to recover gross profit margins toward historical averages (~14–15%).
 2. **Active Capital Deployment:** Deploy the accumulated \$1.3B equity reserve into high-return capital projects—such as EV localized production or regional export expansion—to improve ROE.
- **Conclusion**

Between FY 2022 and FY 2025, UzAuto Motors demonstrated solid top-line revenue capacity, peaking at \$4,450M in FY 2023 before stabilizing around \$4,100M. While core manufacturing margins faced cost pressures in FY 2025, bottom-line net profit remained resilient at \$339.6M. Moving forward, management's primary challenge will be restoring gross margin efficiency while effectively deploying its expanded equity base to generate long-term shareholder value.
